**What is an
infographic?**

**What makes a good
infographic?**

1 It tells a **story**

An effective infographic not only conveys valuable information in a convincing manner, but it also **narrates a story worth telling**

HASIL SENSUS PENDUDUK 2020

Sebanyak **151,59** Juta Jiwa atau **56,10%**
Penduduk Indonesia

2 It takes your eyes on a **predefined journey**

You can be sure of one thing: if a reader's gaze is darting from one end of your infographics to another, trying to figure out where to look next, then it is probably lacking structure and visual hierarchy

The mark of a good infographic is its effectiveness in communicating a message

1

OUR ARTIST TAKES IDEAS AND INSPIRATIONS TO CREATE SKETCHES AND ARTWORK.

2

ARTWORK IS DRAWN DIGITALLY.

3

4

DESIGNS ARE PRINTED ON TO SPECIAL SUBLIMATION PAPER. INK FROM THE PAPER IS TRANSFERRED TO THE FABRIC THROUGH HEAT AND PRESSURE AS GAS. INK PENETRATES INTO THE FABRIC FIBRES.

5

MATERIAL IS CUT INTO GARMENT PANELS. PANELS ARE SEWN TOGETHER TO CREATE A FANCY RUNNING MASTERPIECE.

6

AWESOME GARMENTS MAKE THEIR WAY TO AWESOME PEOPLE FOR THEIR MANY FANCY RUNNING ADVENTURES.

AWESOMENESS

7

GLORY
VICTORY
ADULATION

YOU

At some point you may come back to read this line or maybe not.

WILL READ

THIS FIRST

And then you will read this line next.

You will go back to read this body copy if you want to know more. It takes the most effort to read because it has a lot of text in a small font in a light weight with tight line spacing. Many people will skip paragraphs like this unless if they aren't engaged right away. This is why it's important to draw attention to your message using visual hierarchy.

You'll probably read this before the paragraph.

THE THREE-TRILLION-DOLLAR WAR ITS COST IN TEN STEPS

In 2003, Secretary of Defense Donald Rumsfeld estimated that a war with Iraq would cost \$60 billion. Five years later, the cost of Iraq War operations is more than 10 times that figure. By the time the United States leaves Iraq, the estimated cost of war will be more than \$3 trillion.

Watch the \$3 trillion war unfold in a video at www.good.is.

SOURCES: The Three Trillion Dollar War by Joseph E. Stiglitz and Linda J. Bilmes; War at Any Price? The Total Economic Cost of the War Beyond the Federal Budget by the Joint Economic Committee Majority Staff

3 It is **well structured**

If you have a lot of textual information to present, it's best **to organize your infographic into sections so it is easier to read and scan**

5 Tips

To Keep Your Chin Up

1

Do something impulsive.

Do something impulsive that you haven't planned every day. It's better to have no plan so we can seize the opportunities that may arise.

2

Have rituals.

We are less who we are than what we do. Do 3 things that you love every day. As a result, feeling the gratitude will help you better sleep. Better sleep helps to be in a better mood. A better mood helps to make better decisions.

3

Exercise at least 10 minutes a day.

Exercising has an influence on your brain, on your mood, on your ability to reflect and on your health.

4

Take breaks.

Prevent burnouts by stopping what you are doing and do something else. Create a different atmosphere, add some novelties in your daily routine.

5

Learn something new.

Learning helps to create new connections in your brain and to come up with new ideas and new opportunities.

4 It sends one **key message**

One way to gauge whether your infographic meets this criterion is to **ask someone who wasn't involved in the creation process to explain it to you**

HASIL SENSUS PENDUDUK 2020

5 It is visually **appealing**

One of the big pluses of using an infographic is the **added visual appeal** that makes it stand out from textual content

county	year	county_ra	v001_raw	v001_num	v001_den	v001_cilov	v001_cihig	v001_race	v001_race	v001_ra

How to Become a Data Scientist

BUILD YOUR FOUNDATION

You need two things.

FOUNDATION #1
Linear Algebra.
Try Gilbert Strang at MIT
Gotta watch this!

FOUNDATION #2
Programming.
Try **coursea**
(Get yourself up to the second or third Course.)
TIP: Object Oriented Programming is deep enough.

READ READ READ!
Here are some free must-read books to help get started:

PICK YOUR PLATFORM!
It will probably be either R or Python.

TIP: Really good at one is MUCH better than no-ot in both.

GET A MASTERS DEGREE... IDEALLY IN ANALYTICS

3 OUT OF 4 persons with a job title of "Data Scientist" have a Masters or a PhD degree.

TOP 10 PROGRAMS IN THE US

- MIT
- University of Texas at Austin (McCombs MBA Program)
- University of Southern California (Marshall)
- North Carolina State University (Institute of Advanced Analytics)
- University of Rochester (Simon)
- University of Minnesota (Carlson)
- Southern Methodist University (Cox)
- Michigan State University (Eli Broad)
- Carnegie Mellon University (Heinz College)
- Purdue University (Krannert)

Here's a full list of 45 great schools (Thanks Tammy Royt)

Put Yourself Out There!

Method #1:
Create a freelance profile on Upwork. (This is a great option for picking up gigs and building up your resume.)

Method #2:
Try entering Kaggle competitions. Learn how in 7 minutes!

Method #3:
Network with other data scientists.

Collect Your Rewards!

Average Salary
This year for graduates of the UT Austin McCombs School Masters of Business Analytics program was **\$94,000**

Plus, being a data scientist is fun and interesting work!
The max this year was **\$120,000**

3 OUT OF 4 persons with a job title of "Data Scientist" have a Masters or a PhD degree.

4.0 GPA

TIP1:

To get into a top school, you probably need a 3.9 to 4.0 GPA and a GRE Quant score of 168-170 but you don't need to go to one of the top schools to do great in this field.

TIP2:

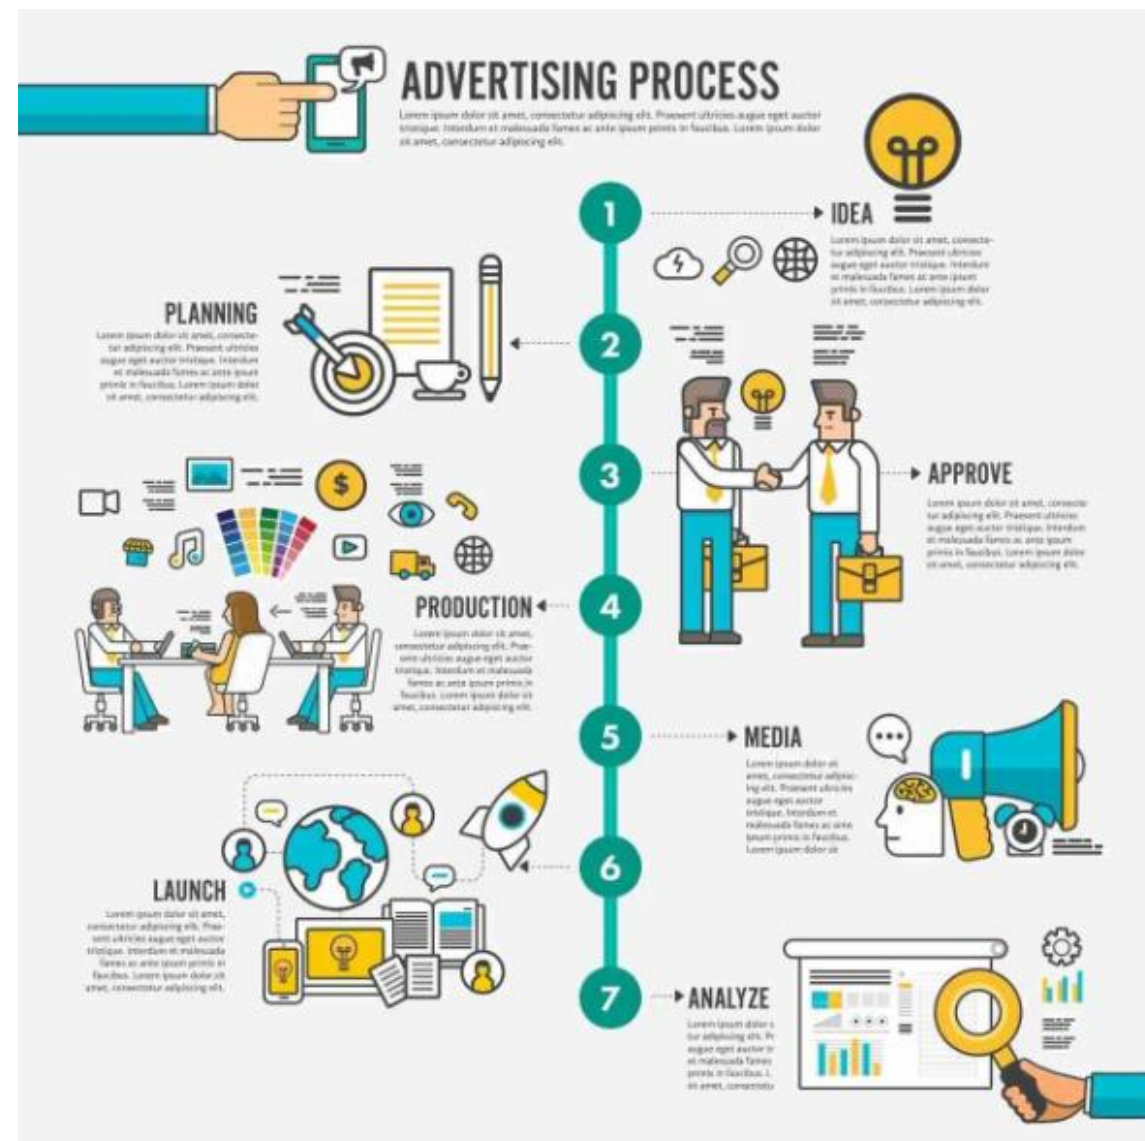

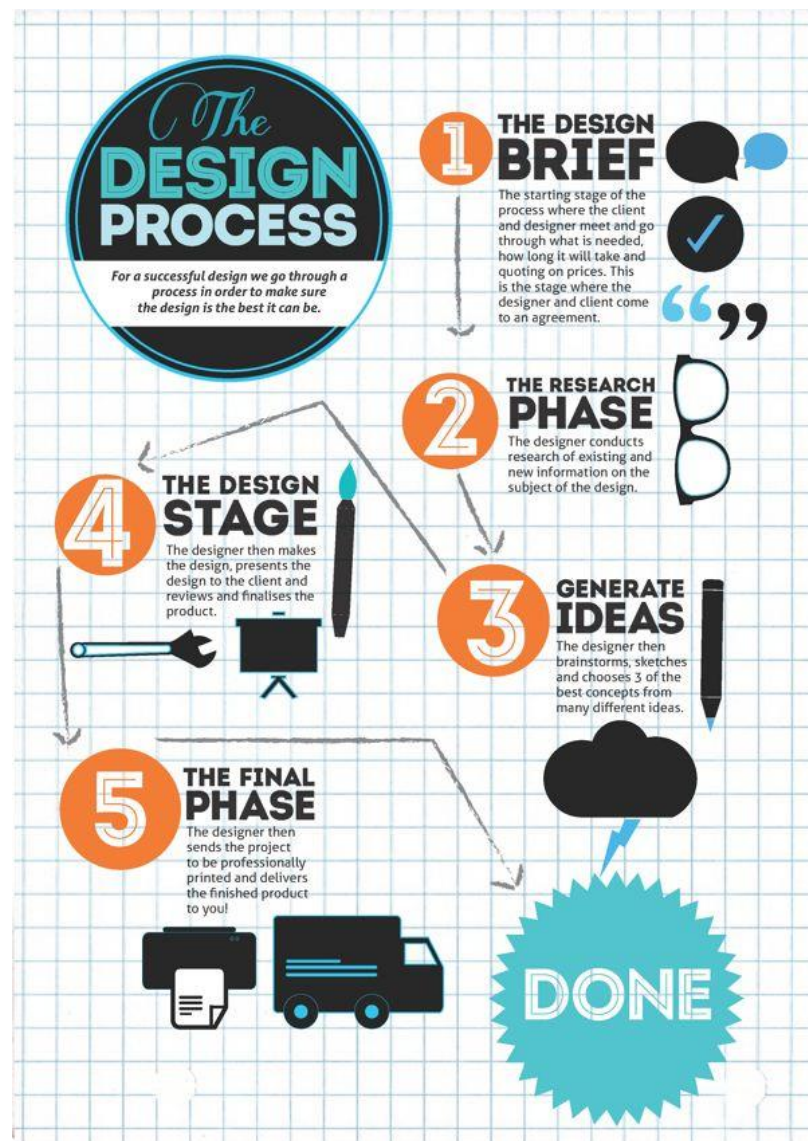

Other kinds of Masters degrees can be OK too, like Engineering, for example. In that case, you'll probably acquire the skills you need on your own, through self-preparation and on-job training.

KEY FACT:

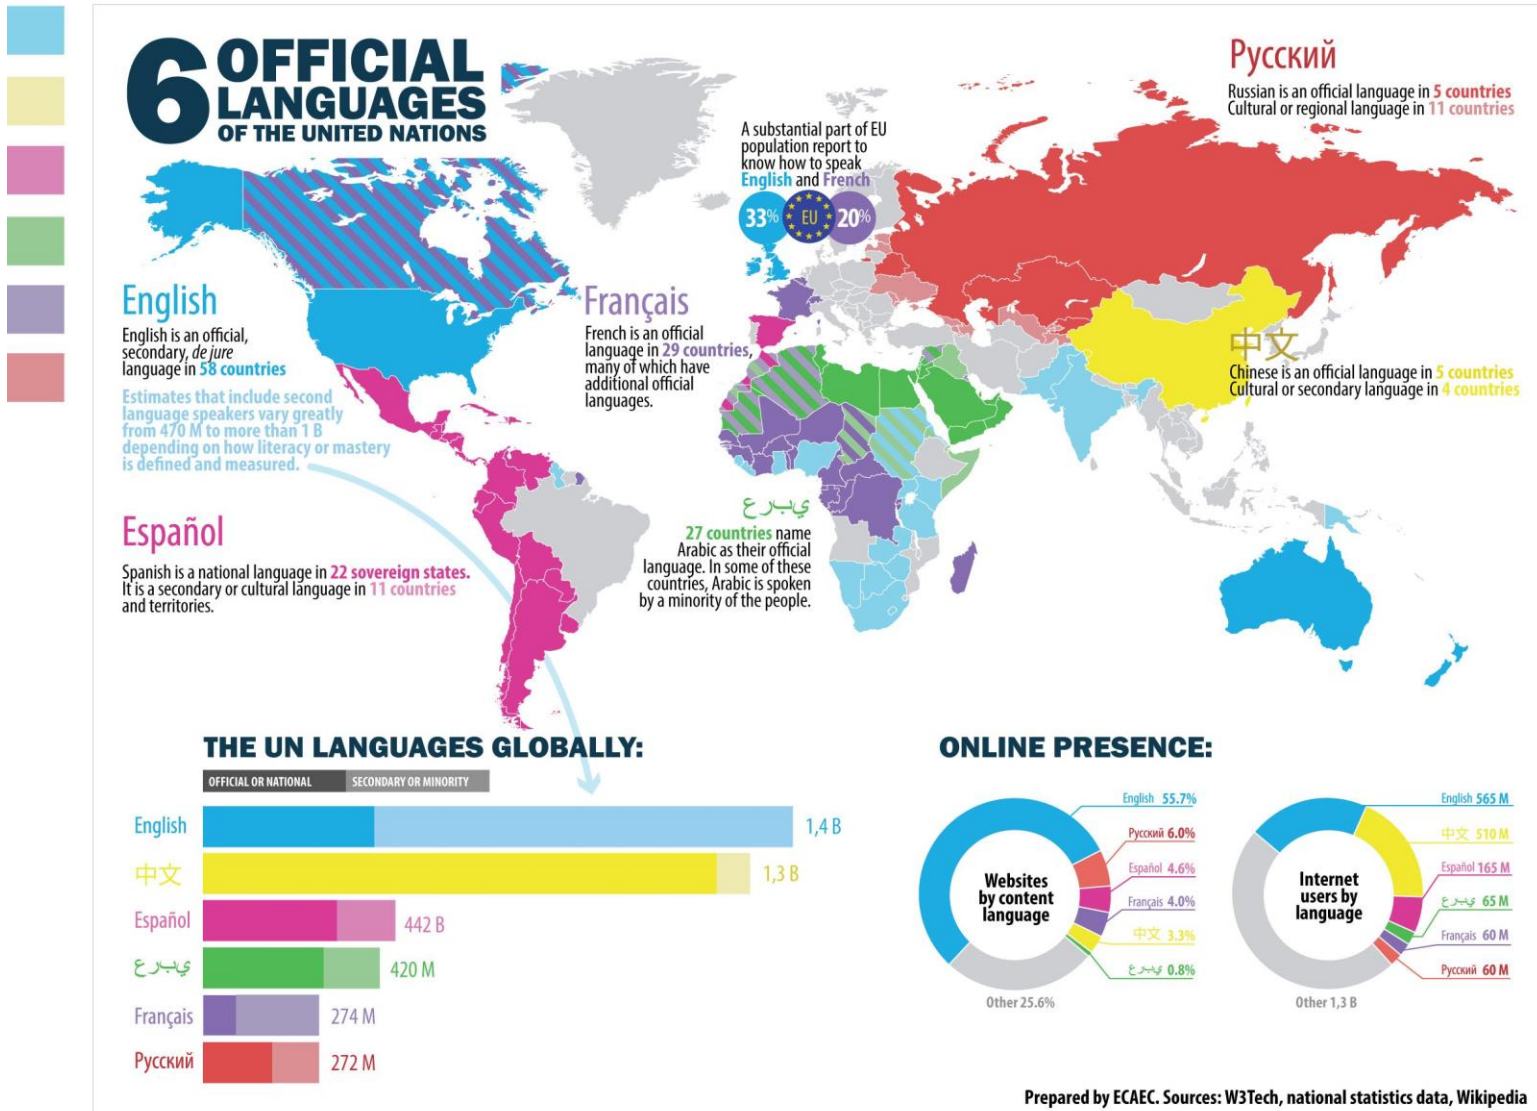

40% of data scientists have posted at least one online certificate on their LinkedIn profile. (The average is 3 certificates.)

Map

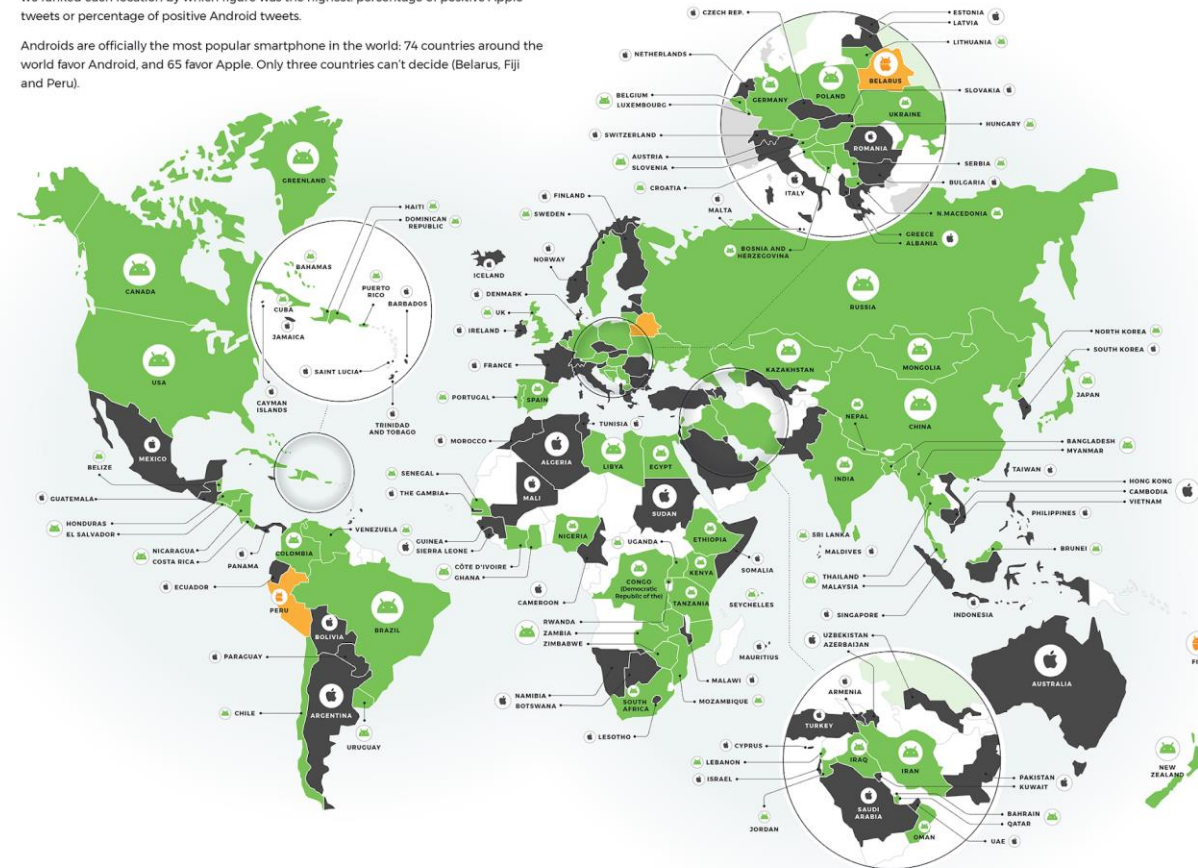

Android vs Apple Phones

WHICH DOES THE WORLD LOVE MOST?

We used an academic language sentiment tool, called SentiStrength, to classify over 340 thousand geotagged tweets about Android or Apple phones as positive or negative. Then we ranked each location by which figure was the highest: percentage of positive Apple tweets or percentage of positive Android tweets.

Androids are officially the most popular smartphone in the world: 74 countries around the world favor Android, and 65 favor Apple. Only three countries can't decide (Belarus, Fiji and Peru).

Methodology:

We compiled a list of Android and Apple model names. Then using Twitter API, we collected 347,656 tweets featuring the words and used SentiStrength, which assesses positive and negative sentiment in texts, to classify each tweet as positive, neutral or negative. We ranked places depending on which was higher: the percentage of positive Apple tweets or the percentage of positive Android tweets.

Steps to creating an infographic

1

Choose your **topic**

The process for creating a shareable infographic is a lot like the process for writing an effective piece of communication. You probably **started by organizing your ideas**, then identifying a thesis statement and arguments to support it

2 Define your **target audience**

Who are you communicating to?
Business executives? Millennials?
Stay-at-home moms? Your answer
to this question will set the tone of
your copy and the overall mood of
your visual theme

3 Define your **goals**

Ask yourself: **what exactly do I want to achieve with this infographic?** Here are a few objectives you may have:

- Reveal hidden trends and patterns using data
- Raise awareness of a specific issue or cause
- Create a comprehensive, go-to visual resource on a topic
- Compare two or more products or concepts
- Translate a story

4 Define the **medium**

Nowadays, many of the infographics created for marketing purposes are **published online**, which saves a lot of time and resources

But if your objective is to translate a **report** into a print infographic that can be handed out at a meeting, then you'd have to consider factors such as the dimensions of your infographic file format and image resolution

5 Find the right **information**

If you still have to investigate and sift through data to find the **right information**, start by consulting these possible sources:

- Recently published survey or polls
- Newly released reports
- Press releases
- Proprietary company data
- Academic studies
- Interviews with experts
- Your own informal surveys using online form

6 Find the **story in the data**

Now comes the part where you **"interview"** **your data to find a story worth telling**. By asking many questions, you will obtain various interpretations of the same data instead of simply sticking with your first reading

How-To

Do you have an article you want to turn into an infographic?

Informational / List

Let's try again!

8 How to write **copy**

To do this, consider your answer to the questions

- Who is your **audience**?
- What is your **primary purpose**?
 - to educate, entertain, inspire or persuade
- What is your **thesis statement**?

Then, try to sum up the main message of your infographic in just a sentences

“Find the surprise in your data and add it as the title.”

Swizec Teller

9 Create a **wireframe**

Now comes the part where you start **translating your text into visual elements**. Make sure to include the following in your wireframe:

- Placement of titles, subtitles and introduction
- Placement of highlighted stats and figures
- Rough sketches of charts and graphs
- Rough sketches of illustrations or icons

Tips for designing the infographic

1 Visual theme

Deciding on a **visual theme**

2 Color scheme

■ Choosing a **color scheme**

Red: passion,
romance, anger

Orange: optimism,
happiness, energy

Yellow: happiness, hope

Green: fertility, nature,
abundance

Blue: professionalism,
calm, transparency

Purple: luxury,
royalty, creativity

Black: elegance,
mystery, darkness

White: purity,
cleanliness

Brown: enduring,
dependability, nature

Beige: conservatism,
piety, dullness

■ Choosing a **color scheme**

Keep it simple

The 60-30-10 rule

3 Font combinations

■ Choosing a **font combinations**

OSWALD

Old Standard TT

Rokkitt

Ubuntu

Vollkorn

Exo

Abril Fatface

Josefin Sans

PT Mono

Open Sans Condensed

Colaborate

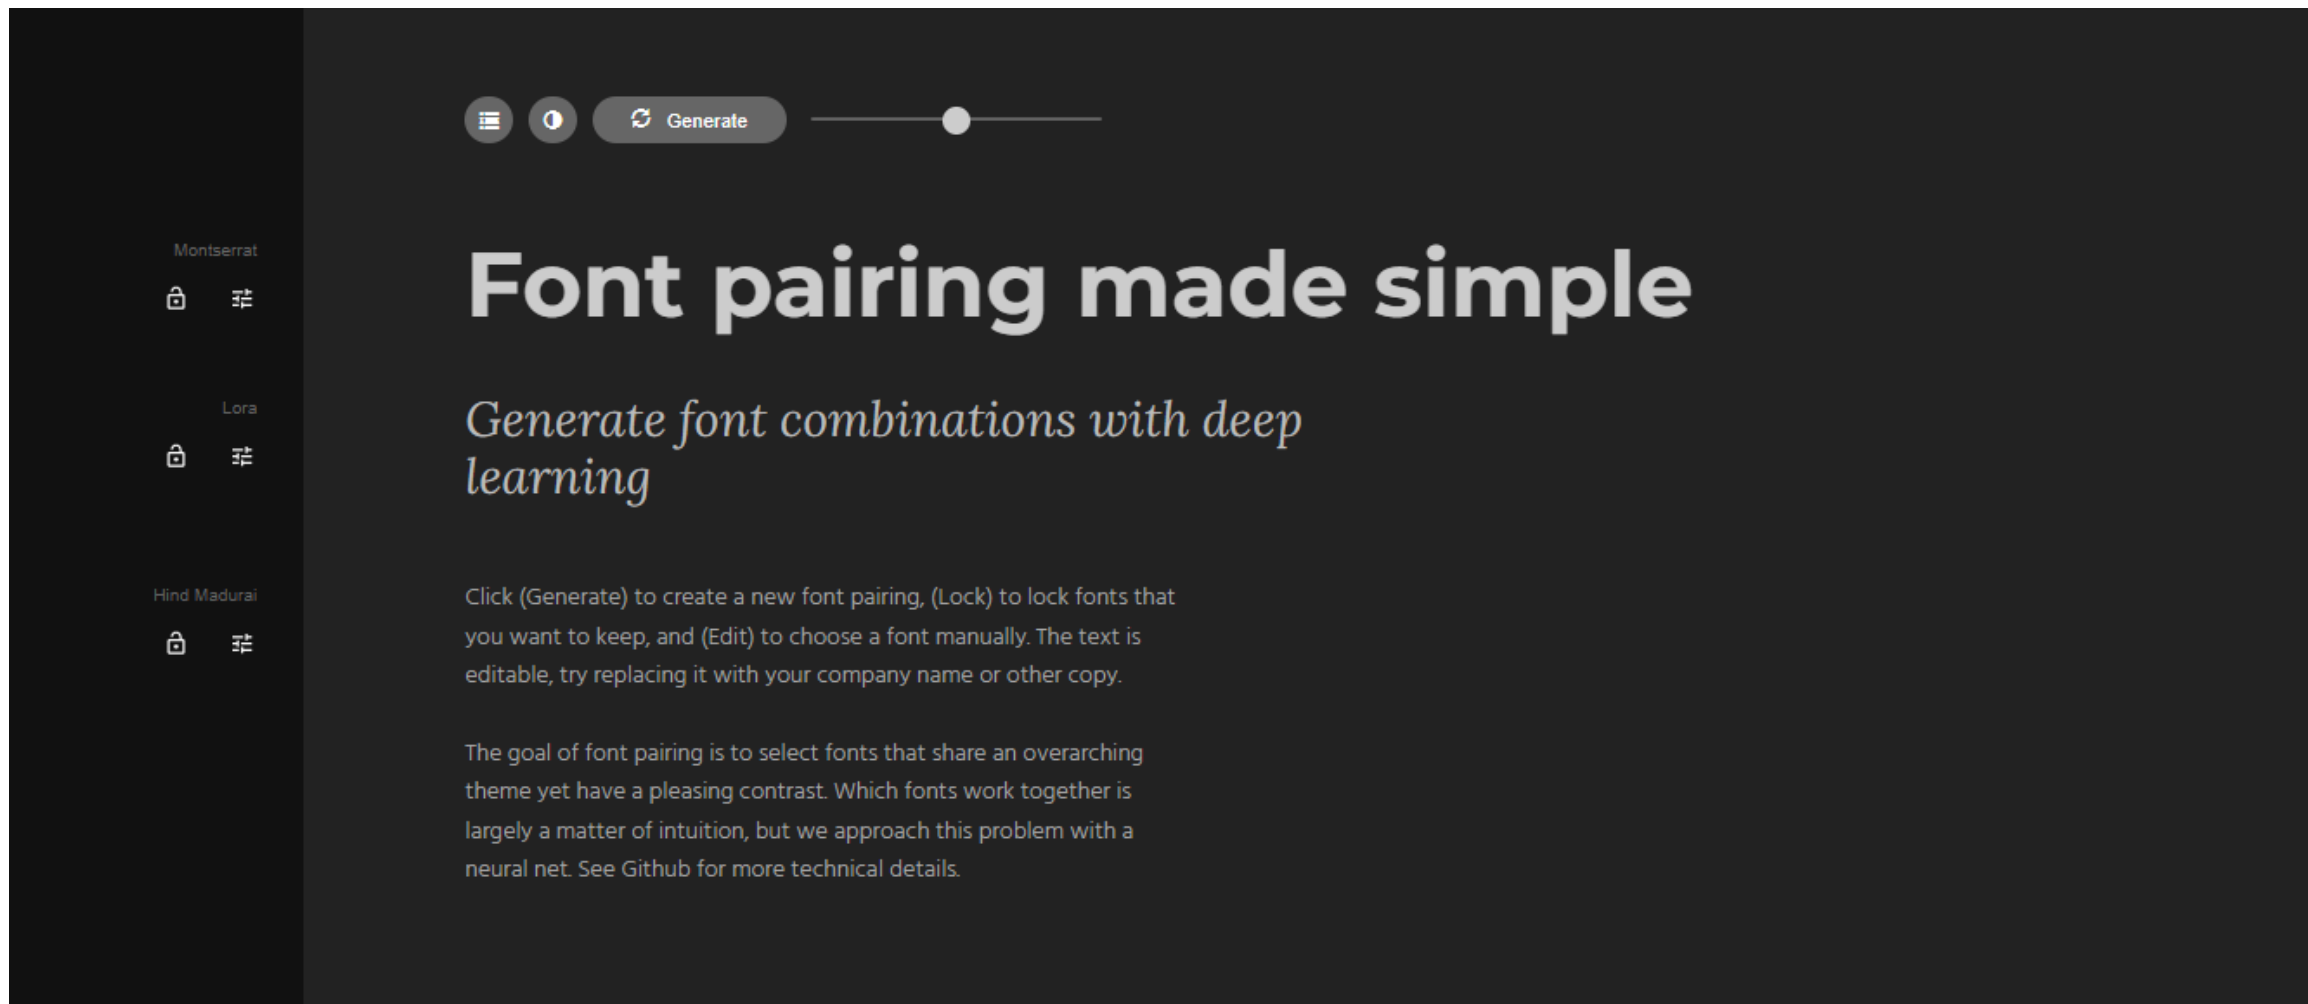

Titillium

Lobster

Lato

Ubuntu

Source Sans Pro

<https://fontjoy.com/>

■ Choosing a **font combinations**

Achieve contrast and create visual hierarchy by varying the point size between the different fonts for headlines, subtitles and body text

Assign a role to each of the fonts used. For example, you can use the same font for subtitles, another for the body text, a third font for data explainers, and so on

■ Choosing a **font combinations**

Pair a distinct font that has a lot of personality with a more neutral one

Stick to two-max three-combinations

4 Icons

■ How to use and select the **right icons**

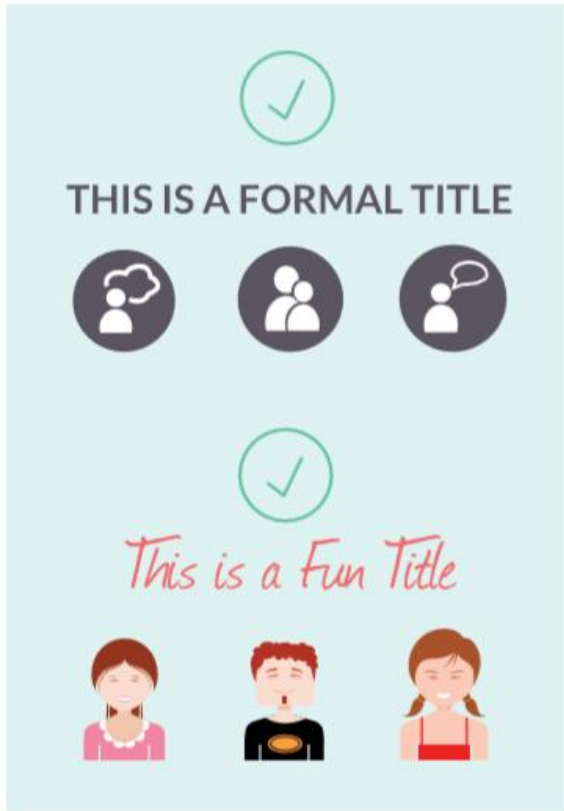

Replace names and titles with icon

Use icons in graphs and charts

■ How to use and select the **right icons**

Pair icons with fonts

Pair icons with color palette

Stick with one icon style

5 Effective visuals

■ How to create **effective charts**

Before

When do people buy on our website?

■ How to create **effective charts**

Source: Good Charts

Ask yourself, "can this be summarized?" If certain details are not essential, then consider summarizing certain elements by grouping them into broader categories

How to create **effective charts**

How Interested Are You In This Product?

After

HOW INTERESTED ARE YOU IN THIS PRODUCT?

In order to limit eye movement from one end of the chart to another, eliminate legends when possible and instead label segments, lines or bars directly

6 Background images

■ How to choose **background images**

Graphic elements are superimposed over images to create a simple yet attractive visualization.

Images of European cities are used to create a look and feel evocative of scenic white winters.

■ How to choose **background images**

Rules to keep in mind when combining images with text and other graphic elements:

Choose images that evoke the right emotions. Well-chosen photos speak volumes all on their own

Use fonts that reinforce the mood and message of your background image

■ How to choose **background images**

Rules to keep in mind when combining images with text and other graphic elements:

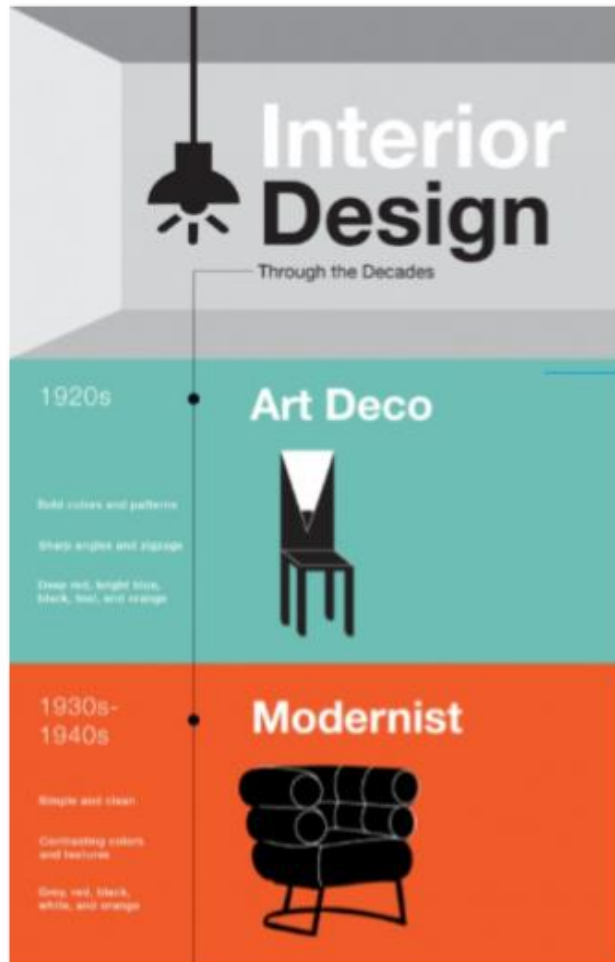

Make text readable. One way to do this is to place text inside shapes and frames to make it stand out against the background image

Use a degree of transparency to create a more uniform surface for typography and apply text colors that provide sufficient contrast with the background

7 Section dividers

■ How to choose **section dividers**

Colors

Alternate colors for each section. Stick to two-max three-colors and, when suitable, use tones, shades and tints of the same hue.

Arrows

Here, the reader's gaze is directed by arrows that are extensions of the different blocks.

How to choose **section dividers**

Ribbons

Ribbons, both flat ones and others with a bit of depth, are commonly used in infographics.

Numbers

One of the most commonly used ways to segment your infographic is to use numbers to separate each section.

Final thoughts
